Description

The Information section displays specific company information in the footer of every page (as seen in the screenshot below). See Information for more information on the footer page.

The Information page can be found under Catalog > Information. On this page the administrator will have the option to edit, delete, or insert a new Information page.

As an admin I want to have a Catalog module in place to perform all the administrator tasks (ST3AB-1)

Description

Product reviews can be both submitted and viewed by customers on the product page. A customer can fill out a review form and submit it to be approved for publication on the site.

In the Dashboard the administrator can view how many customer reviews are awaiting approval in the Overview section. To approve these reviews, the administrator may visit Catalog > Reviews, select the review, and click "edit". OpenCart will display the author, product, and text review in separate text boxes. Selecting "enabled" under status will make the review publicly available on the product page.

Description

This section is only applicable to you if you sell digital products, or products that have a downloadable component such as a PDF User Guide or similar.

To insert a new download, you must give the downloadable product a name, upload the file, and set an allowance for the number of downloads per customer. The mask option allows the administrator to give the file a different visible filename. Press "Save" to submit the download information and save it.

As an admin I want to have a Catalog module in place to perform all the administrator tasks (ST3AB-1)

[ST3AB-16] As an admin, I want to be able to see the Manufacturer list to add new manufacturer information Created: 12/Jul/24 Updated: 12/Jul/24

Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Description

The Manufacturer names below came with the install. They can be deleted, and new manufacturer information can be added in its place. The manufacturer information should be created before products are added, so the manufacturer category can be selected when adding the product. Saving a product without including the manufacturer isn't advised, because customers can search for products in the store front through their manufacturer page. With the manufacturer missing from the product information, the product will not be available on those pages.

As an admin I want to have a Catalog module in place to perform all the administrator tasks (ST3AB-1)

[ST3AB-15] As an admin, I want to be able to see the list of Options to customize the details that the customer sees when they check out a product

Description

The Options section, under Catalog, lets you customize what details the customer sees when checking out a product. On the product page, the "Available Options" section is displayed under the price. The option for that product must be selected before the customer can add the product to the shopping cart.

Description

Attributes in the administration

The attributes section lets you edit the attributes compared between products in "Product Comparison". When viewing products in the store front, customers have the option to add products to "Add to Compare" to analyze the similarities and differences between products in the store. Attributes can be used to describe the size, weight, color, and any other specifications of the product that have potential for comparison. You can create these attributes in the Catalog > Attributes area. To add attributes directly to products, visit the Attribute tab under Products.

Description

The Product section, accessed under Catalog, will display all the products available in the store.

If you would like to look up a product in the product list, you can use "Filter" as a shortcut to search for it. For more information on the Filter tool, visit Filter. Pressing "Insert" in the top right corner will direct the administrator to a form to add new products.
Every row of product will contain the following information:

Image
Product Name
Model
Price
Quantity
Status: Selecting "Enabled" lets the product be visible in the store's store front. Selecting "Disabled" will remove the product from view.
Checking an individual box in the first column will select the product information within the same row. Once selected, you can choose to "Copy" or "Delete" the product. "Copy" will duplicate the product and it's information categories. "Delete" will remove the product selection (including its information) completely.
Manage product information including name, description, images, pricing, inventory levels.
Link products to specific categories, manufacturers, and downloads.
Configure product options (e.g., size, color) with associated variants and pricing.
Manage attributes (e.g., weight, dimensions) for detailed product specifications.

Description

- filter by Category List information
- lists all the category products and imported into to Catalog
- view, edit and add details of a paricular category of products
- delete the category products
- add the category product

The category list shows all product categories entered and imported into the Catalog. You can view/edit the details of a particular product category by clicking on the Category Action button. To view the list of categories select Catalog - Categories from the main menu.
